Problem Set 2

For this problem set, you'll use CS50 IDE, a cloud-based programming environment.

What to Do

1. Go to ide.cs50.io (<https://ide.cs50.io>) and click “Sign in with GitHub” to access your CS50 IDE.
2. Submit [Readability](#).
3. Submit one of:
 - [Caesar](#) if feeling less comfortable
 - [Substitution](#) if feeling more comfortable

If you submit both Caesar and Substitution, we'll record the higher of your two scores.

When to Do It

By Thu, Dec 31, 2020, 8:59 PM PST.

Though CS50x's deadline has already been extended to 31 December 2021, *this version* of this problem set will only be accepted until the date and time above. Thereafter, you may only submit work from CS50x 2021, which will be released on 1 January 2021. **Not sure you'll finish the course by then** (<https://cs50.harvard.edu/x/2020/faqs/#i-wont-be-able-to-finish-the-course-before-31-december-2020-what-will-happen>)?

Advice

- Try out any of David's programs from class via [Week 2](#)'s source code.
- If you see any errors when compiling your code with `make`, focus first on fixing the very first error you see, scrolling up as needed. If unsure what it means, try asking `help50` for help. For instance, if trying to compile `readability`, and

```
make readability
```

is yielding errors, try running

```
help50 make readability
```

instead!
